

Heavy-Duty Industrial Lead Set

LS-AL-95

Product Overview

The Heavy-Duty Industrial lead set is engineered for heavy-duty jump starting and high-current power transfer applications. Built using 95mm² super-flex pure copper multi-strand cable, the assembly delivers high conductivity, flexibility, and dependable long-term durability in demanding environments. Designed for workshops, mining operations, defence fleets, heavy transport, and mobile service applications.

Technical Summary

Voltage rating	1.5kV (600V to 1000V for DC systems)
Cable Size	95mm ²
Cable Lengths	3m / 6m - ANDERSON TO CLAMP
Cable Type	Super Flex Pure Copper Multi-Strand - Double Insulated

Key Features

- 95mm² super flex cable construction
- Pure copper multi-strand cable
- Crimped and soldered connections
- Heavy-duty construction for industrial applications
- Suitable for workshop, mining, fleet, and field-service use
- **Suitable for 12V-24V-48V-72V systems**
- Available in 3m and 6m lengths

Typical Applications

- Heavy transport vehicles
- Mining equipment and machinery
- Fleet maintenance workshops
- Mobile field-service operations
