

MULTI CHARGE PRO 1210 MODULAR CHARGING SYSTEM

ONE SYSTEM. UP TO 12 BATTERIES.

The Multi Charge Pro 1210 Modular is a powerful, daisy-chainable charging system designed to handle multiple battery chemistries at once. Perfect for workshops, fleet maintenance, battery service and industrial charging applications.

MODULAR & DAISY-CHAINED FOR MAXIMUM OUTPUT

4 CHANNELS 1 UNIT

8 CHANNELS 2 UNITS

12 CHANNELS 3 UNITS

Daisy-chain up to 3 units for up to 12 total charging channels.

4 INDEPENDENT CHANNELS

Charge up to 4 batteries simultaneously in each unit for maximum efficiency.

AUTO-DETECT & ADAPT

Automatically detects and adapts to the correct battery type for safe, optimal charging.

FLEXIBLE EXPANSION

Daisy-chain up to 3 units per standard 230V 10A circuit for up to 12 charging channels.

INDIVIDUAL LIVE V/A INDICATION

Custom analogue volt and amp meters on each channel for easy live monitoring.

BUILT-IN PROTECTION

Integrated safety features protect your batteries, equipment and investment.

MULTI-CHEMISTRY COMPATIBILITY

AGM

LITHIUM

GEL

FLOODED

Handle different battery chemistries simultaneously – AGM, Lithium, Gel, Flooded.

All with auto-sensing technology that adapts to each battery type for safe, efficient charging.

SAFETY FEATURES

- Reverse polarity and short circuit protection
- Anti spark suppression when connecting and disconnecting batteries
- Thermal protection and power throttling
- AC/DC breakers
- Custom analog volt and amp meters for easy live readings
- Simple red / amber / green notifications

SPECIFICATIONS

Model:	BC-MCP-1210-04M
System Voltage:	12V
Charging Channels:	4 Independent Channels
Battery Types:	AGM, Lithium, Gel, Flooded
Maximum Configuration:	3 Units / 12 Channels
Supply Configuration:	Up to 3 Units on One 230V 10A Circuit
Dimensions:	530 x 400 x 310 mm
Weight:	16 kg

APPLICATIONS

BATTERY SHOPS

FLEET WORKSHOPS

INDUSTRIAL

SERVICE CENTRES
